

GreenGuard®

Technical Bulletin #4

Building Wrap

Contribution To LEED™ Credits

Overview

The LEED™ Green Building Rating System version 4.1 is a tool that enables a design professional to accumulate credits for a specific building based on meeting certain criteria relating to the use of environmentally preferable, sustainable and energy efficient building materials and systems. Kingspan GreenGuard® Building Wrap can contribute to achieving LEED™ rating points in the category listed below.

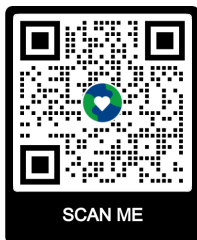

Energy and Atmosphere (EA) (Optimize Energy Performance)

Requirement

There are different options, depending on how the architect will install the product into the building. The amount of points will vary depending on the LEED rating system.

Contribution

Kingspan GreenGuard® Building Wrap reduces unwanted air infiltration into the wall cavity, thus helping to protect the installed R-value of insulation regardless of the type of thickness of the cavity or sheathing insulation.
