

GreenGuard®

LG XPS Insulation Board for Commercial Roofing & Waterproofing

In buildings with Protected Membrane Roofing (PMR) systems, extruded polystyrene rigid foam insulation board is the leading choice. The roof becomes an active space, either as a landscaped green roof or as a terrace or plaza level that occupants can use. Kingspan GreenGuard® LG XPS Insulation Board provides high compressive strength, low water absorption and durability, protecting the roof membrane from physical and weather damage during and after construction.

- Extruded Polystyrene is the industry standard for insulation specifications in these systems
- Compatible with all major waterproofing systems
- Available in 40 psi and 60 psi
- Edge treatments: drainage channel, square edge

Handling & Storage

When stored outdoors, XPS should be protected from exposure to direct sunlight using the original packaging or an opaque, light-colored tarp. XPS that has been unwrapped should be covered or rewrapped. XPS left exposed should be covered within 60 days to minimize UV damage. Once the exposed XPS is covered, the damage stops and is limited to
